Wallbridge Initiates Resource Estimate on Broken Hammer Zone; Provides Positive Results from Ongoing Exploration

Toronto, Ontario – April 13, 2005 – Wallbridge Mining Company Limited (TSX: WM) today announced that it has initiated a resource estimate on the Broken Hammer Zone at the Wisner Property. New results from an ongoing drill program continue to provide encouraging results.

Wallbridge has retained Roscoe Postle Associates Inc. to prepare a first phase resource estimate for the Broken Hammer platinum-palladium-gold-copper mineralized zone. Metallurgical test work is currently underway at SGS Lakefield on material from the Broken Hammer Zone.

An additional 20 holes have now been completed on the Broken Hammer Zone, bringing drill density to approximately 25 metre centres, and extending the zone to the southwest. Assay results have been received for 8 of the 20 holes, with assays for the other 12 holes pending.

The results from all holes recently received are tabulated below.

WISNER DIAMOND DRILL ASSAYS

Drilling is continuing on the southwestern down plunge extension of the zone, which remains open. A down hole DCIP survey was recently completed by JVX Ltd., of Richmond Hill. Results of this survey will help target future holes on the extensions of the zone.

Alar Soever, President and Doug Hunter, Vice President Exploration, today will present an exploration update at the Company's annual meeting, which will be posted on its website for viewing (www.wallbridgeminig.com).

Assays reported in this press release were completed at SGS Canada Inc. Mineral Services in Toronto, Ontario and ALS Chemex in Vancouver, B.C. using a standard fire assay for Au, Pt, Pd and sodium peroxide fusion/ICP finish for base metals.

The Qualified Person responsible for the technical content of this press release is Alar Soever, P.Geo, President of Wallbridge Mining Company Limited.

About the Company

Wallbridge Mining Company Limited explores for and develops nickel, copper and platinum group element deposits. The Company's principal properties are located in the Sudbury Basin in Ontario. The Sudbury area hosts the world's largest concentration of nickel deposits and is currently the most active mining camp in North America. Wallbridge also has properties elsewhere in northern Ontario, Manitoba, Nova Scotia and near Duluth, Minnesota.
